Art Unit: 2631

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Eric Robinson (Reg. # 38,285 on May 19, 2000.

The application has been amended as follows:

In the Title of the Invention:

The title of the invention, "STERLIZING DEVICE AND METHOD FOR STOOL" has been changed to read as ---METHOD AND CIRCUIT FOR AQUISATION---.

Remarks:

The above Examiner's Amendment was made to make the title of the invention more descriptive.

1. The following is an examiner's statement of reasons for allowance: The claimed subject matter in claims 1-13 is allowable because the arts of record fail to teach or fairly suggest the claimed "a synchronization acquiring circuit for receiving a baseband signal transferred as an intermediate frequency signal by down converting intermediate frequency signal obtained by down-converting a received radio wave and for acquiring a radio frequency channel comprising a plurality of pattern detection means (5-1 to 5-3 in fig. 3 and 54-1 to 54—5 in fig. 8), claimed in claims 1 and 7, disposed in parallel each

Application/Control Number: 10/049,808 Page 3

Art Unit: 2631

(claimed first, second and third pattern detection means in claims 2 and 13, and first through fifth pattern detection circuit means in claim 8) performing an operation of receiving the baseband signal transferred by the intermediate frequency signal of a different frequency range (the claimed base band signal having a predetermined frequency range, higher frequency range and lower frequency range in claims 2,8 and 13) and detecting predetermined frame synchronization pattern and in combination with the carrier recovery means (50 and 56-59) as in claims 1,2,7,8 and 13."

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

- 3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent number 5,251,210 issued to Mann et al. discloses a receiver having a plurality of pattern detectors.
- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tesfaldet Bocure whose telephone number is (571) 272-3015. The examiner can normally be reached on Mon-Thur (7:30a-5:00p) & Mon.-Fri (7:30a-5:00p).

Art Unit: 2631

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mohammad H. Ghayour can be reached on (571) 272-3021. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
